Albatron GeForce FX5600 Turbo

Generalidades

> Grapics Engine: GeForce FX5600.
> Memory Size: 128MB DDR.
> Memory Bus: 128bit.
> Engine Clock: 325MHz.
> RAMDAC: 400MHz.
> Max. Resolution: 2048X1536@75Hz.
> Bus Standard: AGP 8X / 4X.
> VGA Output, TV-out, DVI.
> WINDVD Creator.
> 3D GAMES: Duke Nukem (Manhattan Project) Game Pack.

Especificaciones

Albatron's FX5600P Turbo Features

> Powered by nVIDIA GeForce FX5600 GPU
> AGP 8X with AGP Texturing and Fast Writes
> CineFX engine supports DirectX9.0 & OpenGL1.4

> NVIDIA Digital Vibrance Control 3.0

> RAMDACs 400MHz

> D-Sub, DVI and TV-out Ports

> Supports nView Technology

FX5600 Chipset Features

> AGP 8X
- Provides double the bandwidth of AGP 4X—2.1GB/sec. vs. 1.1BG/sec. AGP 8X enables more complex models and detailed textures, creating richer and more lifelike environments.

> CineFX Engine
- Pixel Shader 2.0+ for long programs up to 1024 instructions
- Vertex Shader 2.0+ for long programs with up to 65,536 instructions
- Enables stunning, cinematic-quality special effects, assures game compatibility because it is the most complete implementation of DX9, and it makes shading programs run faster
- Delivers film-quality effects and studio-quality color for every application.

> NVIDIA Intellisample technology
- The industry’s fastest and highest quality antialiasing delivers ultra-realistic visuals, with no jagged edges, at lightning-fast speeds.

> Architected for Cg
- Ensures that the newest, cutting-edge special effects in applications will run flawlessly. It also can speeds up content creation so game developers can get their new games out to PC users faster than ever before.

> NVIDIA nView multi-display technology
- Connect and control multiple displays for the ultimate in viewing flexibility.

> Albatron's FX5600P Turbo System Requirement
- Free AGP port 8X/4X
- CD or DVD ROM for software installation
- 32MB system RAM minimum
- 30MB free hard disk space minimum
- Operation system - Windows® XP, Windows® Me, Windows® 98, Windows® 2000, Windows® NT
